TECHNICAL SKILLS

- Flutter
- Kotlin
- Go
- Java
- Angular
- Springboot
- Docker
- MongoDB
- React
- Python
- AWS
- Nginx

SOFT SKILLS

- Leadership
- Teamwork
- Adaptability

LANGUAGES

- English
- Sinhala

ACHIEVEMENTS

Cutting Edge (1st place)

Smart Pregnancy Belly Wrap
(Novalith) – IoT-based maternal health monitor (2025)

CodeSprintX (3rd place)

Smart Pregnancy Belly Wrap
(Novalith) – IoT-based maternal health monitor (2025)

ABOUT ME

An enthusiastic software engineering undergraduate passionate about developing innovative solutions in mobile and web applications. Skilled in Flutter, Kotlin, and Go, with a strong foundation in software development principles and a keen interest in real-time systems. Eager to apply my knowledge in a dynamic work environment to enhance both my academic and professional skills

EDUCATION

B.Eng.(Hons) Software Engineering

University of Westminster
2024-2027

Completed GCE O/L

Rajapaksha Central College
2014-2019

Completed GCE A/L

Rajapaksha Central College
2019-2023

WORK EXPERIENCE

Software Engineering Intern

Evolza - Colombo, Sri Lanka
July 2025 – July 2026

- Developed and maintained a comprehensive service management application using Kotlin, Flutter, and Angular, delivering responsive mobile and web experiences with intuitive navigation.
- Designed and implemented scalable RESTful APIs using Go and MongoDB, ensuring efficient data management and high system performance.
- Integrated Firebase Cloud Messaging for real-time notifications, Google Maps for location-based services, and Auth0 for secure authentication and authorization.
- Deployed and managed applications on AWS infrastructure using Docker containers and Nginx as a reverse proxy, improving scalability and reliability.
- Configured and maintained DevOps workflows, including containerization, server deployment, environment configuration, and application monitoring.

PROJECTS

Smart Pregnancy Belly Wrap (Group Project)

- <https://github.com/chalindu19/NOVALITH>
- Designed a wearable device for continuous maternal and fetal health monitoring, enabling real-time data tracking and cloud access for healthcare providers. Focused on requirements elicitation, UX design, and compliance for underserved regions.

Expenze

- <https://github.com/NadilGT/Expenz>
- Created Expenze, a cross-platform mobile application using Flutter, which calculates and tracks expenses and incomes. Designed an interactive GUI to display and customize financial items, offering real time calculations and a user-friendly experience

Dice Game App

- https://github.com/NadilGT/Mobile_CW_02
- Built an interactive dice game using Kotlin Jetpack Compose, implementing multiple activities with intent for seamless navigations and an engaging user experience

Spotify-Clone

- <https://github.com/NadilGT/spotify-clone>
- Built a cross-platform music streaming app with user authentication, real-time database, cloud storage, and playlist management using Flutter and Firebase

Skin-firts (Healthcare Management System)

- <https://github.com/NadilGT/skin-firts>
- Developed a complete healthcare management platform with Flutter, React, Go, and MongoDB, including patient management, doctor appointments, medical records, billing, inventory, and administrative features. Built scalable APIs, cross-platform applications, and deployed the system using AWS, Docker, and Nginx.

Real-Time Ticketing System

- https://github.com/NadilGT/oop_backend_new
- Design and developed a real-time event ticketing system using Java for the backend (CLI) and Angular with Spring Boot for the GUI.
